Micro
Filtration

Air driven Off-line filters

RMF Systems radial micro filter units are characterised by their extremely efficient filter elements with a fineness of 0.5 micron. If required, different micron sizes are available to suit any specific application.

The Air driven Off-line filters can also be equipped with special water absorbing pre-filters in case of extreme water contamination. These water absorbing spin-on cans will remove most of the water prior to the fluid reaching the cellulose element.

Specially designed for industrial hydraulic installations the Air driven RMF Off-line filters are available in single or multiple housing configurations. The Off-line filter units can be easily mounted to new and existing hydraulic installations.

By means of an integrated air driven motor-pump unit in the Off-line filter, the oil is pumped from the reservoir through the filter unit. After filtering the oil is returned to tank. The Air driven Off-line filters can continue to work even when the main system is not in use. Element change can also be done without interfering with the main system.

Economical

The hydraulic market accepts that 80% of mechanical failures are caused by contamination in the system.

The RMF Off-line filters attack this contamination at source and in addition to solid particles. These filters are also capable of removing water from the oil. This prevents the catalytic reaction of water and solid particle contamination, resulting in extended useable oil life.

The use of RMF filters means less defects, less maintenance, and less wear and tear of the hydraulic components.

Applications

The Air driven RMF Off-line filter units can be fitted to every imaginable industrial application where hydraulic and/or lubrication systems are present. The air motor makes the unit suitable for use in explosion hazardous areas, or areas where no electrical power is available.

The standard range of Air driven Off-line filters can be utilised in reservoirs with a maximum volume of 11,000 litres.

In recent years RMF Systems have developed a great deal of experience in cleaning and keeping clean hydraulic and lubrication systems in the:

- steel industry;
- plastic moulding industry;
- maritime industry;
- petro chemical industry;
- paper industry.

Advantages

- Extremely clean oil due to high filtration efficiency.
- Prevention of channel forming by radial filtration direction.
- Large dirt holding capacity.
- Large water holding capacity.
- Compact and easy-maintenance design.
- Environmentally friendly elements available.
- Longer usage life for oil and components.
- Reduces cost of ownership.

TECHNICAL DATA AIR DRIVEN OFF-LINE FILTERS

Filter model	OLUA1A30...	OLUA2A30...	OLUA1B30...	OLUA2B30...	OLUA4A30...	OLUA4B30...	
No. of filter housings	1	2	1	2	4	4	
Material filter housing	Anodised aluminium						
Seal material filter unit	Buna-N standard						
Nominal flow @ 1.500 rpm	2.1 l/min	4.2 l/min	4.2 l/min	8.4 l/min	8.4 l/min	16.8 l/min	
By-pass opening pressure	6.2 bar (at 0 bar back pressure)						
No. of filter elements	1	2	2	4	4	8	
Length filter elements	300 mm (standard)						
Max. pressure filter housing	20 bar						
Max. oil temperature	80 °C						
Dirt indicator	Pressure gauge (0-10 bar, green/yellow/red zones)						
Connection pump suction	3/8" BSP female	1/2" BSP female				3/4" BSP female	
Diameter hose suction side	1/2"					3/4"	
Connection return port	1/2" BSP female				EW 18L - 3/4"		
Diameter hose return side	1/2"				3/4" or 1" (with long hoses)		
Dimensions h x w x d (mm)	425 x 400 x 240	425 x 365 x 340	730 x 400 x 240	730 x 365 x 340	530 x 400 x 500	830 x 400 x 500	
Pump type	Hydraulic gear pump						
Air motor pressure supply	Max. recommended operating pressure 7 bar (100 psi)						
RPM air motor	Speeds may be varied from 300 to 3,000 rpm						
Power output air motor	Delivers up to 1,5 kW (2 hp)						
Max. tank volume	± 1,350 l	± 2,700 l	± 2,700 l	± 5,400 l	± 5,400 l	± 10,800 l	
Sample port connections: P1 filter inlet side (red) P2 filter inlet side (yellow)	Test connector M16x2 Test connector M16x2						
Approximate weight	16.0 kg	23.0 kg	20.0 kg	32.0 kg	41.0 kg	63.0 kg
